Job Description: **Live Streaming + A/V Production Technician (Contract)**

Overview

As a result of Congregation interest and Covid-related impacts on church operations, Peace Lutheran Church produces a multi-camera mixed live streaming worship service every Sunday morning at 10:30 AM Pacific Time. This service is a core part of the church's engagement with the community and service to both visitors and church members. To date, the live streaming technology platform is considered professional level and has been built and managed by volunteers with a mix of both self-taught and professional experience in audio/video production, communications, and IT disciplines.

In an effort to make this outreach a sustainable mission for our congregation and the wider community as a whole, Peace Lutheran Church and its members have funded a part-time position responsible for the weekly production of the church's live streamed worship.

Status

This is a part-time, **independent contractor** position that takes place on-site at Peace Lutheran Church unless all elements of the worship service are pre-recorded. A minimum of 3 hours weekly is anticipated with some weeks requiring more hours.

Schedule + General Expectations

The focus of this position is based on Sunday morning live streamed worship services that take place from 10:30 AM to approximately 11:30 to 11:45 AM Pacific Time (actual end time varies and is dependent on the runtime of the service). Peace Lutheran Church anticipates on-site requirements from 9:00 AM to 12:00 PM every Sunday, in addition to 1-2 hours arranging media assets and communicating with staff / volunteers on an ad-hoc basis throughout the week ahead of the service.

To Apply

People qualified and interested in this position may apply by submitting a cover letter and resume to Pastor Erik Kindem: pastor@peacelutheranseattle.org CC: office@peacelutheranseattle.org
