

MDC's Highlights in Community-Led Development

For more information or to donate online, go to developmaji.org. The Maji Development Coalition YouTube channel has videos of each of these big projects.

Give light—Give hope—Give love

A solar kit replaced flashlights in the clinic to provide light for night births.

Solar home lighting kits replace open fires—less smoke, lights for students to do homework, less wood carrying. MDC has installed over 350 kits on Maji family homes.

A new pump powered by solar = safe, clean water for a town of 3500.

MDC installed solar for the regional hospital. It was built to serve 60,000 but had no power source after a small temporary generator burned out.

MDC has started the WISHES program—Women in Self-Help Empowerment Societies. Four pilot groups have formed, serving 80 women. Revolving funds will help them start income producing co-ops.
